

The flight from London should take about three hours. It's unlikely to be very hot, even though we're going in summer, but there will be many hours of daylight. We're looking forward to catching and eating our own salmon and trout and we're hoping to do some bird-watching, too: the island is home to many seabirds. We'll also be swimming in pools filled with water from natural hot springs. We're bound to enjoy it - we both love out-of-the-way-places.
